

Controller

We, at Eddy Grid, want to accelerate the energy transition. We do this by better matching production and consumption of green energy. With our smart energy management and trading software, we help our customers with their energy challenges, which can range from lacking sufficient power throughout the day or being confronted with large costs for their grid connection.

We believe in transparency, fair pricing and good products and services.

The role:

As a controller Star within Eddy Grid you will:

- Facilitate the business in insights of the financial situation and forecasts.
- You take ownership of the journal entries including the preparation of the monthly reporting and coordinate all what is needed with regards to cash flow planning.
- Be a sparring partner of the founding team and the CFO in developing the financial backbone of Eddy
- Spot and carry out new opportunities to improve finance

In addition, we are a startup. This means new situations and challenges will come up. As such, our controller star can take up smaller topics and/or projects to further build our organization, ranging from salary admin to funding round preparations or other.

You are:

- A do-er. You get things done and are not afraid to try new things
- Pragmatic. You can easily switch between day-to-day solutions and setting up for scale
- Flexible. We are a startup, you are comfortable to operate in changing environment
- Social and curious. You can connect well within the organization and like to work with others
- Strong communicator. You are clear and can get a message across
- Structured & Data Driven. You have the overview and work in a structured manner
- A financial with over 5 years of working experience
- Preferably an RC or RA (CPA)

- Have knowledge of financial systems like Moneybird, Exact, Excel, G-Suite, Moss and other financial tooling
